1) Connect mouse to computer

2) Extract software (WinRAR file)

3) Open Map/folder **"mouse fix software"** (double click)

4) Open **"MS_Fix2 software"** (double click)

5) Go with mouse pointer to [Mouse Set 2 — Click to SET.] window and click once on it

6) If you see this window [Mouse Set 2 — Set OK] after you've done point 5 your mouse is re-connected and should work as normal

7) Click on the white cross in the red square at the right upper corner of the window to close the software
