KAYA 360

USB gaming headset

KAYA 360 USB GAMING HEADSET

Introducing the Lorgar Kaya 360 USB gaming headset - the ultimate accessory for gamers who value both style and performance. With its sleek design, this headset will turn heads while you dominate the competition. The gunmetal gray colour of the Kaya 360 is just the beginning of its impressive features. Made of durable plastic with a metal-reinforced headband, this headset is built to last. The earcups rotate for comfort and easy storage, while the fabric ear pads provide a comfortable fit during long gaming sessions.

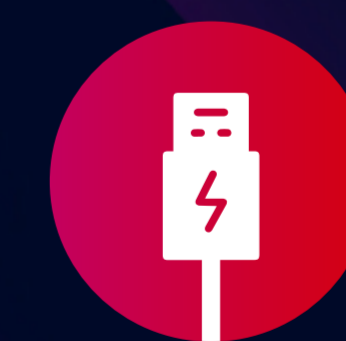

But what really sets the Kaya headset apart is its 7.1 virtual surround sound technology. Immerse yourself in your favourite games like never before with crystal-clear sound that puts you right in the middle of the action. Keep in mind there are 40mm speakers with a frequency range of 20–20,000Hz – the audio experience is a symphony of software and hardware with this headset.

The noise-canceling microphone allows you to communicate with your teammates – and you always know if you're live thanks to the built-in LED light. Whenever you don't need to talk, retract it back into the earcup for a clean look. Plus, there's a designated mute button and a volume wheel, so you can control your audio without missing a beat. By the way, Kaya 360 is plug-and-play: connect it via USB-A, and it's ready to roll. Best of all, this Lorgar headset is focused on functionality, and you don't have to pay for bells and whistles.

Upgrade your gaming experience with the Lorgar Kaya 360 today!

BUILD & DESIGN

Kaya 360 is sure to impress. The headset features a gunmetal colour scheme with a glossy Lorgar logo on the side. Kaya is lightweight, weighing only 312 grams, making it easy to wear for extended periods without any discomfort. The adjustable headband ensures a secure fit for any head size.

EARCUPS AND PADS

The rotating earcups offer maximum convenience during long gaming sessions. The fabric ear pads will not irritate your ears even after hours of use. The earcups can also be rotated to store the headset easily.

VIRTUAL SURROUND SOUND

The Lorgar Kaya is equipped with 7.1 virtual surround sound technology that delivers crystal-clear audio for an immersive gaming experience. The sound quality is exceptional, allowing gamers to hear every detail in their games, from footsteps to explosions. Be right in the middle of the action!

RETRACTABLE MICROPHONE

A retractable noise-canceling microphone offers clear communication with your teammates, and a built-in LED light will serve as a clear indication you are being heard. The microphone can be easily retracted back into the headset body when not in use, giving the headset a sleek look.

AUDIO CONTROL

A volume control wheel and an instant mute button allow gamers to control their audio without skipping a beat.

WIDE RANGE OF COMPATIBILITY

The USB-A connection with Plug & Play makes it easy to connect Kaya 360 to the most popular gaming platforms. Enjoy hassle-free gaming right out of the box.

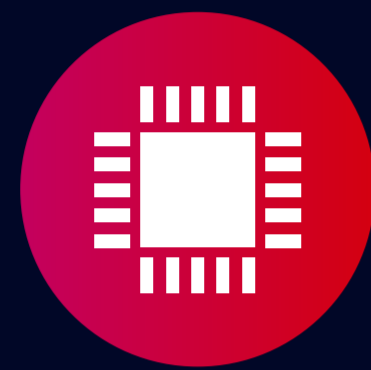

KEYCHAIN INSIDE

Don't forget to get your keychain from Lorgar before you dispose of the packaging!
