AZAR 514 GAMING KEYBOARD

Have you ever wondered what type of keyboard would fit you best?

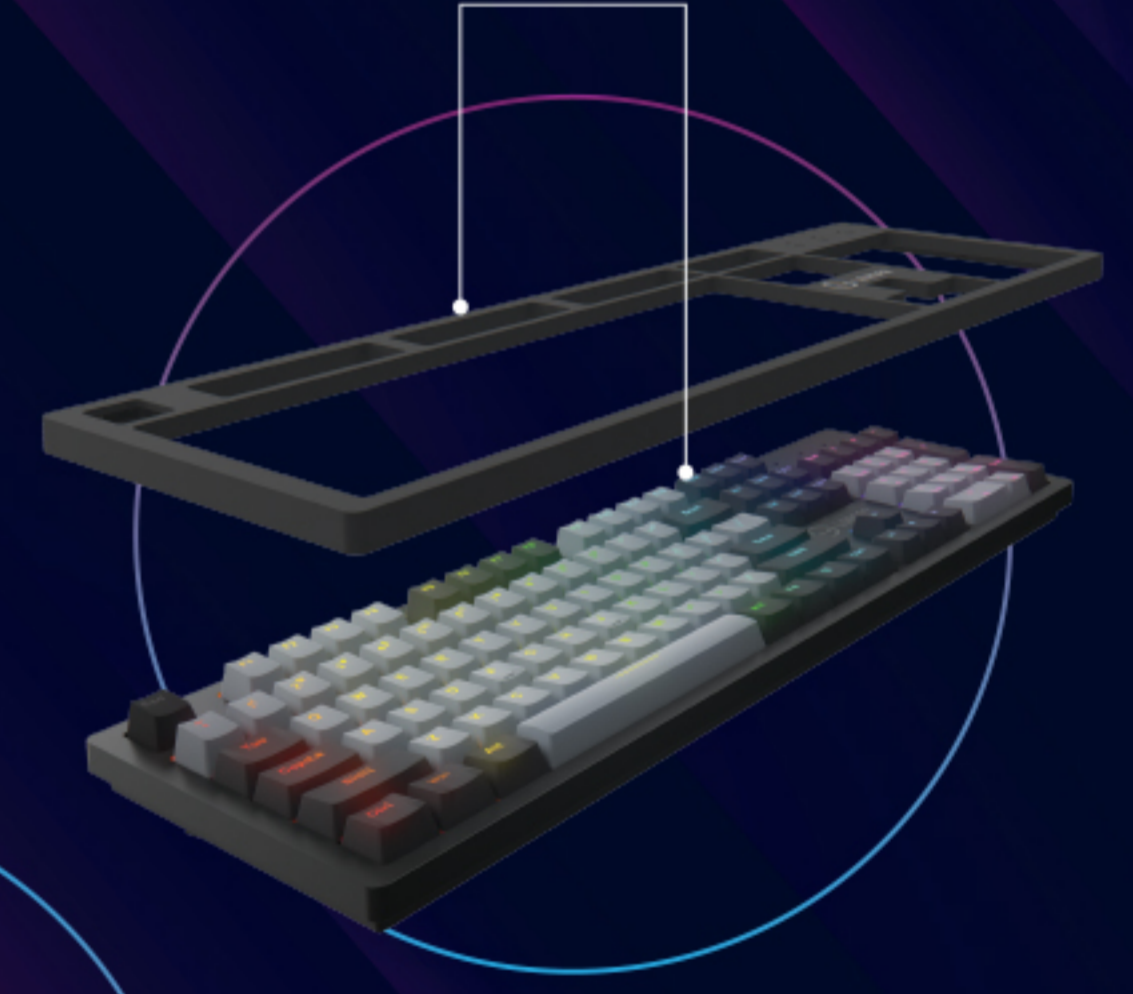

The Azar 514 is here to eliminate the agony of choice. Thanks to its removable magnetic top cover, this unique mechanical keyboard can shapeshift from classic to skeleton body and is built on a durable aluminium base. The Lorgar linear Dream Switches are smooth and silent, featuring a 2mm actuation point and 40 grams of perfectly balanced actuation force. Combined with the ability to withstand 50 million cycles, these 104 keys will be yours forever. All that goodness is illuminated with an RGB backlight, fully customisable with our Lorgar WP software.

The Azar 514 also features quality-of-life design choices: adjustable rubberised feet, removable Type C spring silicone cable that can stretch up to 3.4m, and a cable management system to keep your workspace organised. This keyboard comes in a monochrome or black colour scheme. With any colour you choose, you'll find some pleasant extras in the package. Pick one today because the Lorgar Azar 514 is finger-clicking good!

2-IN-1 BODY
Skeleton / Classic

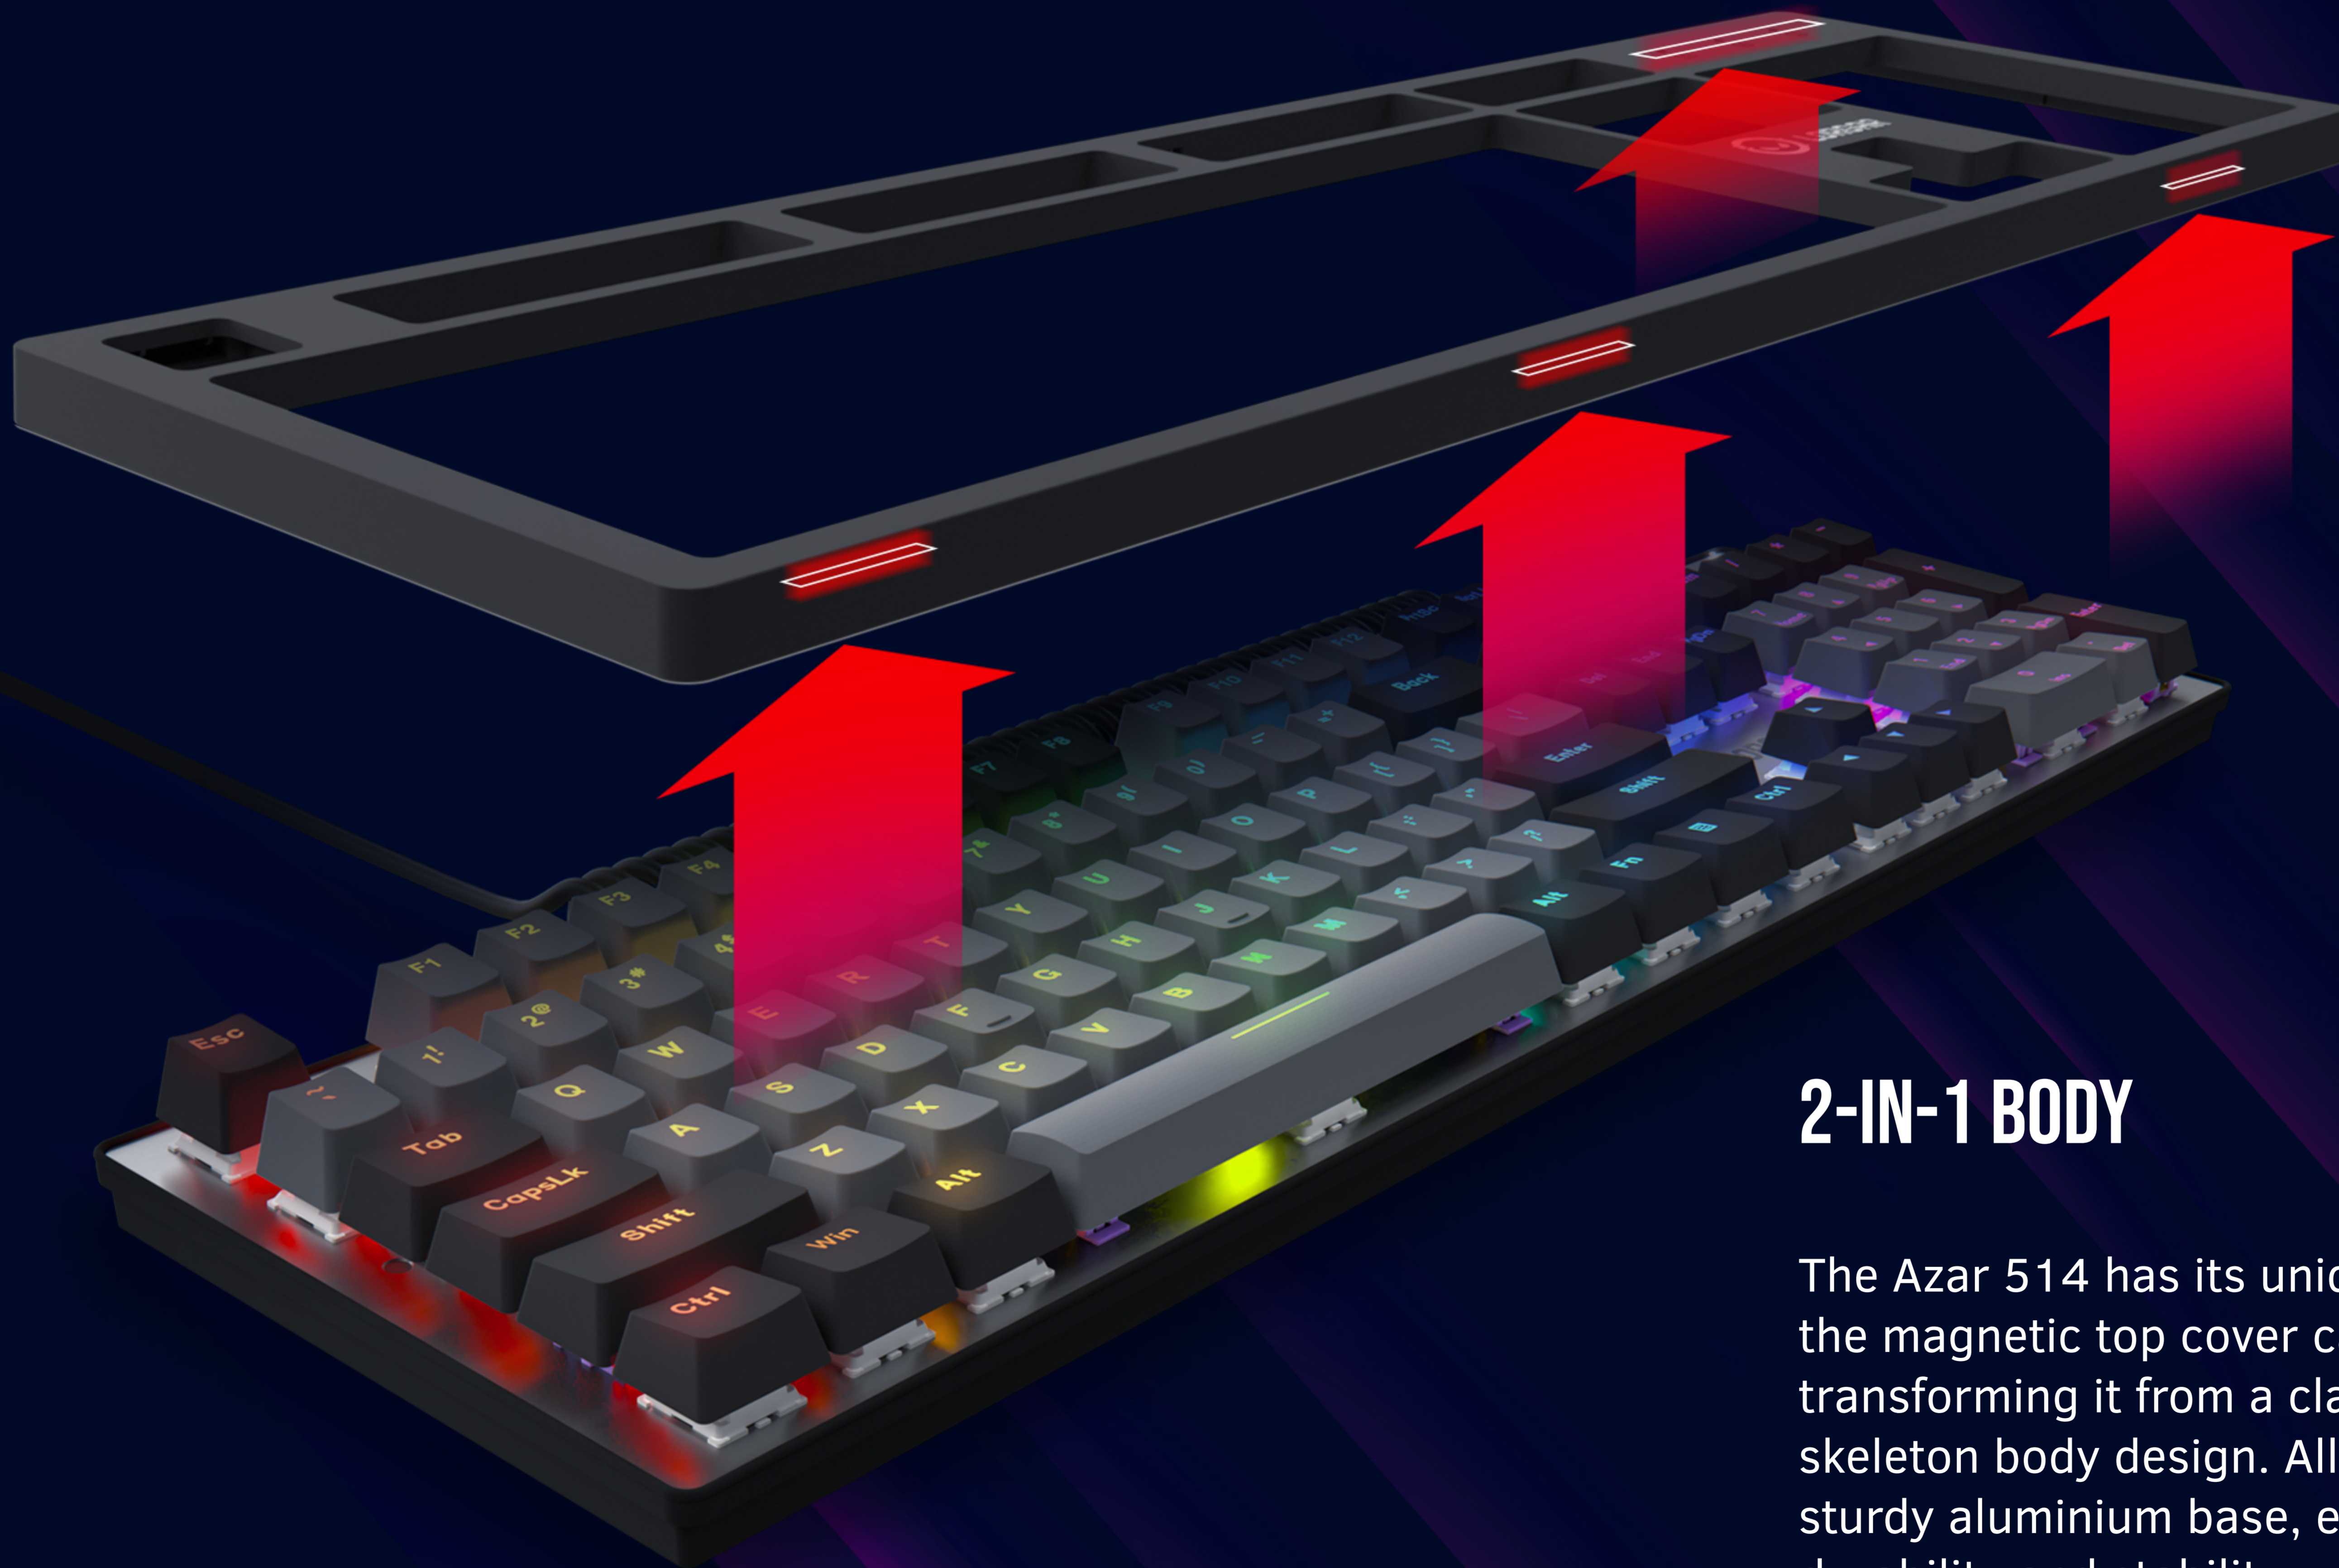

LORGAR LINEAR DREAM SWITCHES

Smooth & silent
Lifespan: 50 million clicks
Operation force: 40 g-force
Actuation point: 2 mm

SPRING CABLE

Detachable cable
USB Type C (to keyboard)
USB Type A (to PC)
Adjustable length: 1.8 - 3.4 m

2-IN-1 BODY

The Azar 514 has its unique feature: the magnetic top cover can be removed, transforming it from a classic keyboard to a skeleton body design. All that is built on a sturdy aluminium base, ensuring long-lasting durability and stability.

SMOOTH & SILENT LINEAR DREAM SWITCHES

These Dream Switches can withstand 50 million cycles, making them highly dependable. With the balanced actuation force of 40 grams, no accidental input is expected, and the actuation point of 2mm within 4mm of travel distance gives you a reaction advantage in-game.

CUSTOMISABLE RGB BACKLIGHT

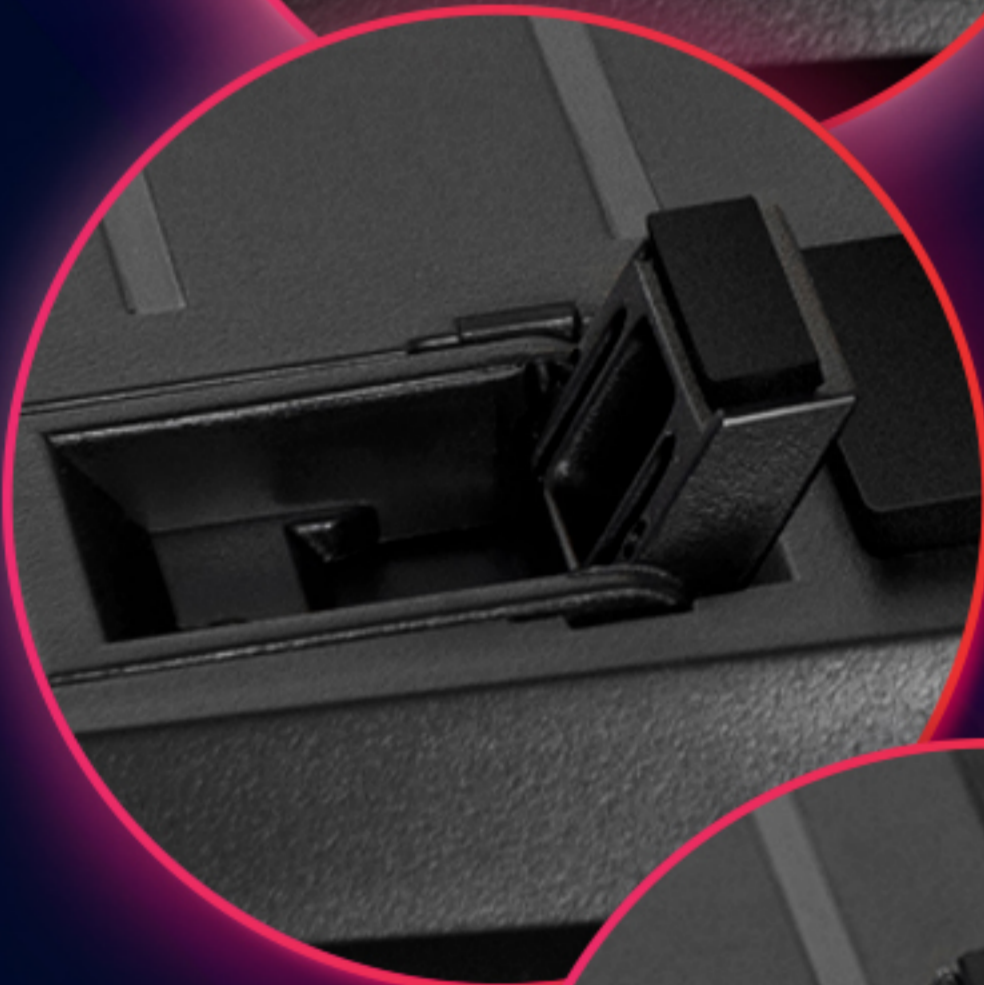

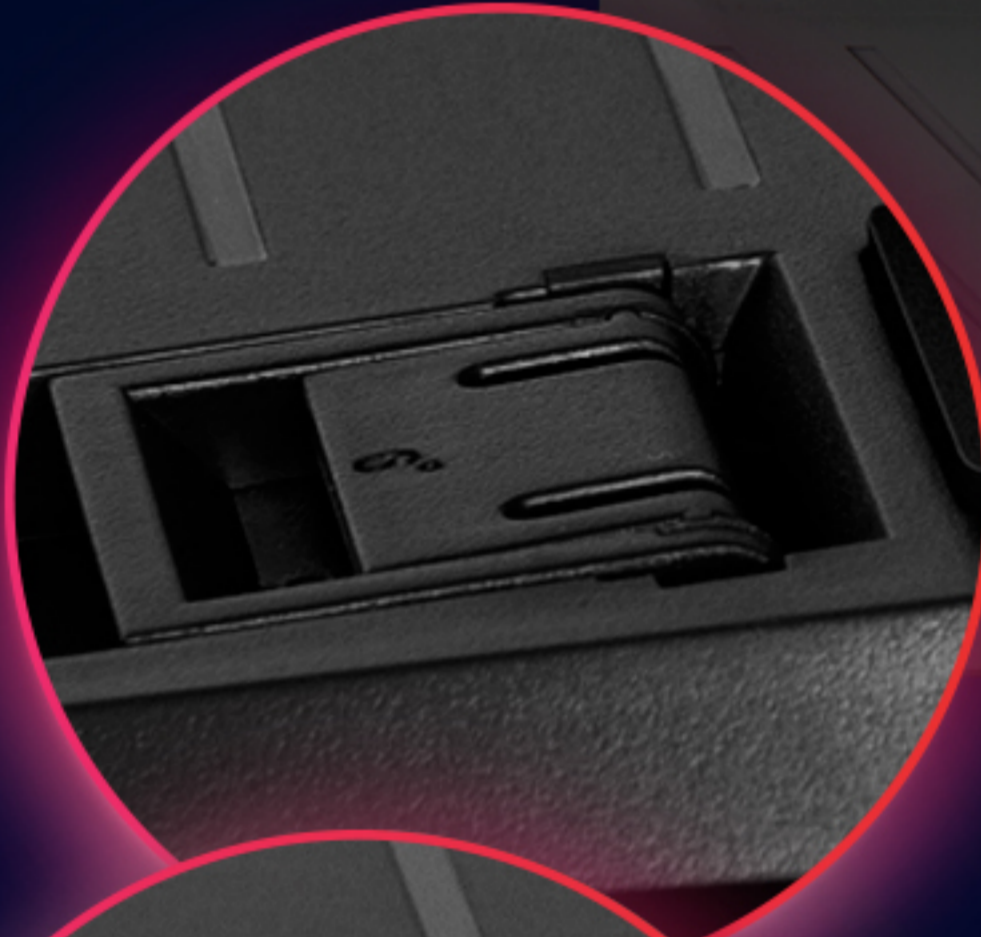

This full-size keyboard features RGB backlighting that can be fully customised and synced with other Lorgar devices using the Lorgar WP.

LORGAR WELL-PLAYED PLATFORM

Besides the ability to customise and synchronise your devices' backlight, our WP software allows you to create gaming profiles, record macros, and remap keys. You can also monitor your gaming performance and statistics for every Lorgar device you own. All of that in one app: Lorgar WP.

LITTLE IMPORTANT THINGS

The Azar 514 has been designed with user convenience in mind, featuring three-position rubberised feet, removable and flexible spring USB (C) – USB (A) cable of up to 3.4m, and a cable management system to keep your workspace organised.

COLOUR OPTIONS

The Azar 514 comes in two colour options: monochrome and black. The monochrome keyboard has black & white gradient keys, black top cover and white base. The black keyboard goes with black & grey keys, black top cover and gun-metal base.
